ELSEVIER

Comput. Methods Appl. Mech. Engrg. 151 (1998) 629–631

Computer methods in applied mechanics and engineering

Contents Volume 151

Volume 151, Nos. 1–2, 15 January 1998

A semi-explicit parallel solver for viscous incompressible flows
H.U. Akay, A. Ecer and K. Fekete 1

Steady filtration problems with seawater intrusion: Variational analysis
G. Alduncin, J. Esquivel-Avila and L. Reyes-Avila 13

On some recent adventures into improved finite element CFD methods for convective transport
A.J. Baker, J.S. Iannelli, S. Roy and D.J. Chaffin 27

Development of BEM for thermoviscous flow
P.K. Banerjee and K.A. Honkala 43

Shallow water theory and its application to the Venice lagoon
M.M. Cecchi and L. Salasnich 63

Flowfield-dependent mixed explicit–implicit (FDMEI) methods for high and low speed and compressible and incompressible flows
K.T. Yoon, S.Y. Moon, S.A. Garcia, G.W. Heard and T.J. Chung 75

A Godunov-type finite volume method for the system of Shallow Water Equations
S. Chippada, C.N. Dawson, M.L. Martinez and M.F. Wheeler 105

Finite element solution of the Navier–Stokes equations for incompressible flow using a segregated algorithm
C.G. du Toit 131

Cross flow tensors and finite volume approximation with deferred correction
M.G. Edwards 143

Refined two-dimensional models for the analysis of free boundary flows between parallel plates
A. Almeida, L. Faria and R. Febra 163

Distributed Lagrange multiplier methods for incompressible viscous flow around moving rigid bodies
R. Glowinski, T.W. Pan and J. Périaux 181

Bifurcation analysis of brown tide in tidal flow using finite element method
M. Kawahara and Y. Ding 195

Constructing wall laws with Domain Decomposition or asymptotic expansion techniques
Y. Achdou, P.Le. Tallec, F. Valentin and O. Pironneau 215

Derivation of stabilized equations for numerical solution of advective–diffusive transport and fluid flow problems
E. Oñate 233

3D computation of unsteady flow past a sphere with a parallel finite element method
V. Kalro and T. Tezduyar 267

Volume 151, Nos. 3–4, 20 January 1998

Study of the behavior of thermal shield support system for the French plants
D.R. Bhandari, R.E. Schwirian, C. Yu, J.C. Matarazzo and N.R. Singleton 277

On solving nonlinear transient heat transfer problems with random parameters
T.D. Hien and M. Kleiber 287

Thermal analysis of the thermal protection system for the re-entry vehicle
K. Ohtake 301

Stability of explicit subcycling time integration with linear interpolation for first-order finite element semidiscretizations
P. Smolinski and Y.-S. Wu 311

Adiabatic shear bands in axisymmetric impact and penetration problems
R.C. Batra and J.B. Stevens 325

Eulerian finite element methods for the micromechanics of heterogeneous materials: Dynamic prioritization of material interfaces
D.J. Benson 343

Computational aspects of disturbed state constitutive models
C.S. Desai and W. Zhang 361

A Voronoi cell finite element model for particle cracking in elastic–plastic composite materials
S. Moorthy and S. Ghosh 377

Design optimization method for compliant mechanisms and material microstructure
N. Kikuchi, S. Nishiwaki, J.S.O. Fonseca and E.C.N. Silva 401

A numerical model of passive and active behavior of skeletal muscles
J.A.C. Martins, E.B. Pires, R. Salvado and P.B. Dinis 419

Symmetric weak-form integral equation method for three-dimensional fracture analysis
S. Li, M.E. Mear and L. Xiao 435

Sensitivity analysis for failure and damage in dynamically loaded tensile bars
A.K. Noor, A. Needleman and J.M. Peters 461

Finite element simulation of the rolling and extrusion of multi-phase materials. Application to the rolling of prepared sugar cane
D.R.J. Owen, E.A. de Souza Neto, S.Y. Zhao, D. Perić and J.G. Loughran 479

Simulation of impact involving an elastic rod
P. Shi 497

Dynamic plasticity models
R.E. Showalter and P. Shi 501

Finite element formulations for hyperelastic transversely isotropic biphasic soft tissues
E.S. Almeida and R.L. Spilker 513

An existence and uniqueness result in bone remodeling theory
J. Monnier and L. Trabucho 539

Nonlinear modelling of hysteretic material laws by dual kriging and application
F. Trochu and P. Terriault 545

Localized failure analysis in elastoplastic Cosserat continua
M.-M. Iordache and K. Willam 559

Constitutive modeling of damage accumulation and fracture in multiphase materials
M.P. Wnuk 587

Adaptive finite element techniques for frictional contact problems involving large elastic strains
P. Wriggers and O. Scherf 593

Finite element analysis and constitutive modelling of anisotropic nonlinear hyperelastic bodies with convected frames
H.C. Park and S.-K. Youn 605
